ARMATURA ONE

All-in-One Web-Based Integrated Security Platform

Multi-Functional FaceKiosk

All-in-One Web-Based Integrated Security Platform

Armatura One is the ultimate "All-in-One" web-based security platform developed by Armatura. It contains multiple integrated modules: Personnel, Access Control, Time & Attendance, Elevator, Visitor, Parking Management, Video Management System, Office, Fire Alarm, Entrance Control, FaceKiosk, Defence, Data Monitor, Building Automation and Intrusion.

Gain Access to Armatura One

P

O

Highlight 1: Web Based Access Control and Time & Attendance Software

Highlight 2: Email, WhatsApp, LINE, Amazon SNS, SMS

Highlight 3: Supports Multi-modal Biometric Recognition

Highlight 4: Alarm Center

Highlight 5: Mobile HTML 5 Web application (Installation Free)

Highlight 6: High-Security Mechanism TLS1.2, RSA2048 & AES256 Encryption

Highlight 8: RESTful API (Java Scripts) for 3rd Party Integration

3rd Party Software

ARMATURA

Entrance Control Management

Defence Management

• Events notification (Email, SMS, Amazon SNS, WhatsApp, LINE) • Multi-biometric identification (Fingerprint, face & palm)

3rd Party Standard SIP

Outdoor Station

OmniAC20

Biometric Standalone Terminal

(Standard SIP V2.0 Ready)

Indoor Video Phone

Armatura ICS Cloud or PBX

IP Phone

(PBX/ SIP Server with VOIP)

Standard SIP Protocol

ARMATURA ICS

- Flexible shifts, multi-level OT, cross day shift, Automatic attendance report generation

Attendance

Merge with 3rd party HR management System

Multi-level approval

AMITSUBISHI

Access Control Time Zone

Specify varying credential requirements for different time zones, such as • Time Zone A: Biometric (palm / face / fingerprint),

- Time Zone B : Mobile credentials
- Time Zone C: 2 Factor authentication.

By implementing this additional layer of security, unauthorized access can be prevented, thereby enhancing the overall safety of the facility

Personnel

Fingerprint login and verification

ARMATURA

Supports various cards format

Entrance Control

Entrance control access rules

Real-time monitoring

Device remote control

Defence

- Global targets monitoring
- Occupancy management

People counting

Allow list, block list and VIP list

Building Automation

· Quick response and handling of Problems

Monitoring and management

Two-factor authentication of driver identity and vehicle verification

License plate recognition

Real-time preview, PTZ control, video playback

(A) digifort

Supports searching of users and vehicles

eocortex[€]

Office

SEC

Automatically changed in every 1s (adjustable)

 Auto-cancellation of reservation Combining QR code in booking system

Visitor self-service pre-registration

Dynamic QR code to access authorized doors

Automatically changed in every 1 to 30 seconds (configurable).

Maximum visitor check

Meeting room and work station reservation

ARMATURA ONE

All-in-One Web-Based Integrated Security Platform

Armatura One is a web-based security platform developed & based on

Overview

the ideas of being Openly Integrated, Highly Secure and User-friendly. Providing a comprehensive security solution including access control, elevator control, visitor management, parking management, time & attendance, building automation and intrusion alarm with the most advanced levels of security. To ease users' cyber security and privacy concerns, all the data within the system is encrypted with Advanced Encryption Standard (AES) and Transport Layer Security (TLS) cryptographic protocols and the whole system is certified with ISO27001, ISO27701 and ISO27017. In addition, it has a RESTful API and SDK to integrate with almost all 3rd party systems. Moreover, with the help of the Armatura protocol gateway; Armatura One supports up to 260+ industrial-grade communication protocols including BACnet, OPC, and Modbus to flexibly integrate with 3rd party industrial-grade sensors and controllers with custom conditions and rules. At the same time, Armatura One supports various authentication credentials in line with advanced biometric technologies, mobile credentials, encrypted dynamic QR codes, and multi-tech RFID technologies to best suit all customer's needs.

Fully integrated with 3rd-party elevator destination control system

Supports different access levels for different users

KONE

Elevator

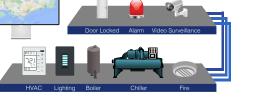

Data Monitor

Parking

· Real time parking lot monitoring

· Payment and charge management

Monitoring vehicles at all exits and entrances
